3-G Status at IIASA

You can attest to your 3-G status and can therefore be qualified as presenting a low epidemic risk if you can produce one of the following:

   
   **Validity periods:**
   
   - BioNTech/Pfizer, Moderna, AstraZeneca – up to 270 days since the second vaccination
   - Johnson & Johnson – valid 22 days since the vaccination; booster vaccination is required by 3 January 2022 at the latest
   - Recovered and vaccinated with one dose – up to 270 days since the vaccination
   - Booster shot – up to 360 days since the vaccination

2. **Proof of COVID-19 recovery**

   **Validity period:**
   
   - A segregation order (Absonderungsbescheid) issued by the authorities or a doctor’s confirmation of a COVID-19 infection, both based on a PCR test – up to 180 days

3. **Proof of official negative COVID-19 test**

   **Validity period:**
   
   - PCR test is valid for 72 hours.
   - Antigen test performed by an authorized body is valid for 24 hours.
