Policy Implications

Towards Innovative Solutions through
Integrative Water Futures Analysis

IIASA, International Institute for Applied Systems Analysis

 @wfas_iiasa

Why?

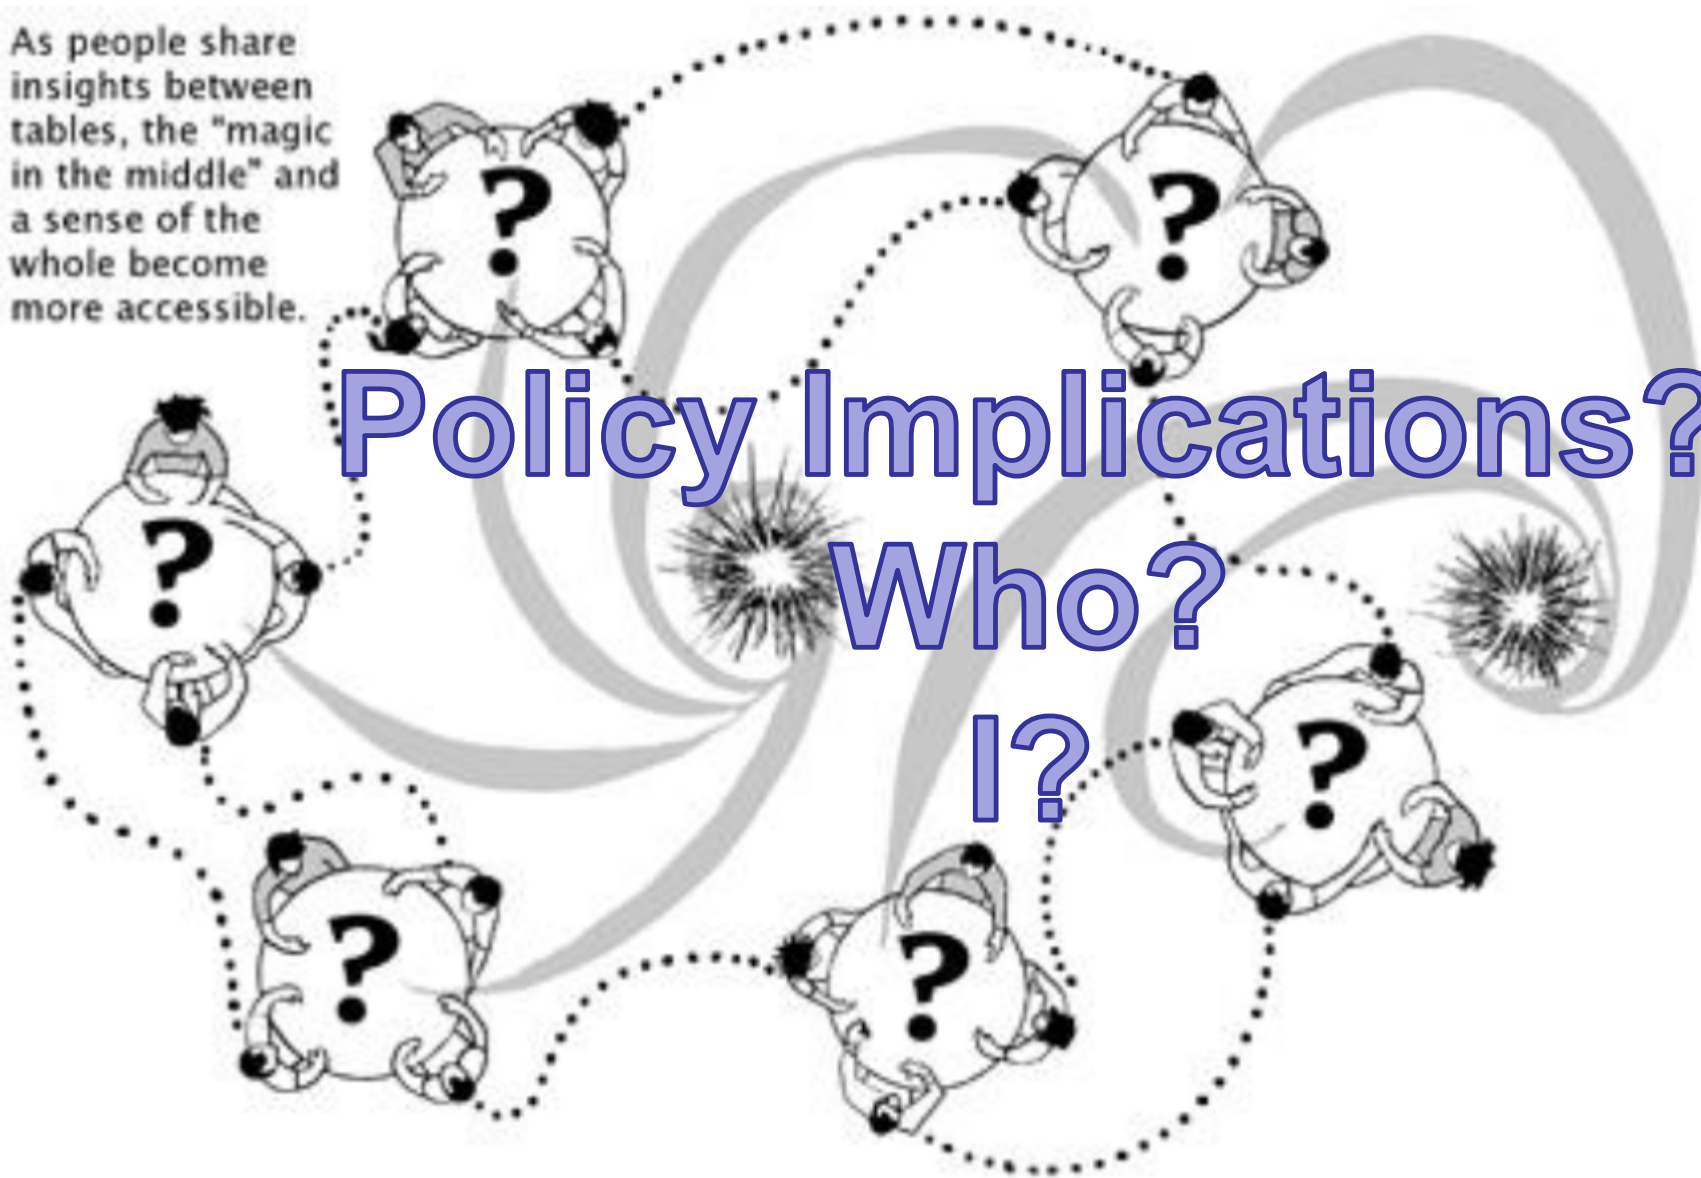

- Digesting the insights of presentations
- Creating ideas for the way forward
- Using the collective intelligence
- For whom is this relevant? and What can I do?

How to organise our world café?

- 3 rounds of engaging dialogues (about 20 min each)

As people share insights between tables, the "magic in the middle" and a sense of the whole become more accessible.

Policy Implications? Who? I?

CAFÉ ETIQUETTE

FOCUS
on what matters!

How to organise our “coffee tables”?

- Decide on a “**host**” who remains at the table
- The host **encourages** everyone to contribute to the discussion
- **All**: Scribble ideas on cards, pictograms, ...
- 2nd, (3rd) round: Host **welcomes** new “**guests**” and briefs them about round 1 (and 2)
- Last group helps host to **summarize**

Question for round 1

What are our key-insights?

What are the policy implications which emerge from the results of the model runs?

Question for round 2

Who can take this forward?

For which policy formulation processes are these policy implications relevant at regional (East Africa) and national levels (member countries of EAC)?

Question for round 3

Where can I be a change maker or agent?

How can I make sure that action are taken into the needed direction?

Help your host to make a summary!
