

### 1.3.1 Navigation Through this Excel File

This EXCEL file is made available on the Internet to satisfy scientific and educational purposes. It is meant for experts as well as for students, who are interested in the issue of temporal verification of net GHG emissions under the Kyoto Protocol.

We tried to make navigation through this file as easy as possible. The worksheet “General” provides information on contact persons of the project *Verification Times Underlying the Kyoto Protocol: Consideration of Risk*, including those responsible for creating and maintaining this file.

The structure of the file is laid down in the worksheet “Contents”. Starting from this worksheet, one can access each section. By pointing the cursor to the underlined section numbers in red and clicking the mouse button, one can access the corresponding section; for example, clicking on [1.1](#) (About this Excel File) will take the reader or user to that section. To return to “Contents”, one needs to click on the return button .

Sections 1 (Verification Time (VT) Concept: Introduction) and 2 (Verification Time (VT) Concept: Approaches) contain hyperlinks to “.pdf” files. Underlined subsection numbers in red and further specification “.pdf” indicate these. For example, Subsection [1.1.1 \(pdf\)](#) (The Intention Behind this Excel File) is linked to a “.pdf” file explaining this topic. By clicking the underlined sub-section number will result in opening this file.

The main information on the VT concept is grouped in Sections 1–6, and the supplementary information, underlying data, etc., are grouped in Annex Worksheets A.1–A.4 and B.1–B.2. Annex Worksheets A.5–A.8 provide additional auxiliary information.
